

NEXALINK TELECOMMUNICATIONS

SOP: CUSTOMER RETENTION & CANCELLATION

Field	Value
Document ID	SOP-05
Version	3.0
Effective Date	18/5/2026
Department	Call Center Operations

Applies to: All agents. The agent owns the call end-to-end: de-escalate, attempt one retention offer, and — if the customer still wants to cancel — process the cancellation directly. Manager Approval tickets are used only for ETF waivers and other out-of-policy concessions; the customer is not transferred.

Steps

Step 1: Open Call & Verify Identity

Field	Value
Precondition	Call connected. Customer likely frustrated.
Action	Deliver greeting, recording notification, and 3-of-5 verification. Complete efficiently — do not let verification feel like an obstacle to a customer who wants to cancel.
Output	Customer verified.
Policy Ref	CS-RULE-001, CS-RULE-002, CS-RULE-004

Step 2: Acknowledge Intent Without Resistance

Field	Value
Precondition	Verification complete. Customer has stated intent to cancel.
Action	Acknowledge first — do not argue or immediately mention fees: ‘I am sorry to hear you are considering leaving. You have been a valued customer and I would like to understand what has brought you to this point.’ Forbidden: opening with ETF information.
Output	Customer acknowledged. Tone de-escalated.

Field	Value
Policy Ref	CS-RULE-011, CS-RULE-012
Step 3: Identify Root Cause	
Field	Value
Precondition	Customer acknowledged.
Action	Ask one open-ended question: ‘May I ask what has been the main frustration — is it the service itself, the pricing, or something else?’ Map response: Price/Value → retention offer. Service quality → resolve via SOP-03 first, then retention. Competitor offer → match/upgrade offer. Relocation → check service availability at new address before assuming cancellation. Deceased/Hardship → skip retention, proceed straight to cancellation with empathy.
Output	Root cause identified and mapped.
Policy Ref	CS-RULE-011
Step 4: Make One Retention Attempt	
Field	Value
Precondition	Root cause identified. Not deceased/hardship.
Action	Make one targeted offer based on root cause. Do not make multiple different offers — it undermines credibility. Price: ‘Let me check if there are any loyalty bundles available on your account that could bring your bill down significantly.’ Competitor: ‘You have been with us for [X] years. May I have two minutes to see if we can match their offer or upgrade your speed at no extra cost?’ Service quality: resolve issue via SOP-03 first, then ask: ‘Now that we have fixed that, does this change how you are feeling about staying with us?’ If the customer declines, do not repeat the offer.
Output	One retention attempt made and outcome noted.
Policy Ref	CS-RULE-011
Step 5: Confirm Decision to Cancel	

Field	Value
Precondition	Customer declines retention offer or requests cancellation directly.
Action	Confirm the decision once, clearly, on the record: ‘I want to ask one last time, on the record — are you sure you want to proceed with the cancellation?’ If yes, proceed to Step 6 and process the cancellation directly. Do not push a second retention offer.
Output	Cancellation confirmed and recorded.
Policy Ref	CS-RULE-011
Step 6: Process the Cancellation	
Field	Value
Precondition	Cancellation confirmed.
Action	The agent processes the cancellation directly: (1) Calculate ETF: \$20 × months remaining on contract. (2) Confirm equipment return requirements (non-return fee \$150 per device); generate prepaid return label and email it on the call. (3) Confirm final bill date and outstanding balance, pro-rated to today’s cancellation date. (4) Mark the account as Cancelled in the billing system. (5) Provide a case reference number. ETF waivers are out-of-policy: if the customer requests a waiver and the request is sympathetic (long tenure, hardship, repeated service failures), open a Manager Approval ticket from the agent’s seat — do not transfer. Inform the customer the waiver decision arrives within 1 business day.
Output	Cancellation processed; equipment return label sent; ETF waiver ticket opened if applicable.
Policy Ref	FIN-RULE-004, KB-PROD-01 Section 4.2
Step 7: Document & Close	
Field	Value
Precondition	Call concluded.
Action	Log case notes within 5 minutes: cancellation reason, retention offer made and outcome, ETF amount, equipment return status, Manager Approval ticket ID if any. Provide case reference number. Do not offer post-call

Field	Value
Output	survey if cancellation was completed (CS-RULE-021 exception).
Policy Ref	Case notes saved. Call closed.
Key Rules	CS-RULE-021, CS-RULE-022
• Cooling-off period customers (within 14 days of contract start) are entitled to a full no-questions-asked refund. Do not use the retention offer to delay their request. (FIN-RULE-009) • Relocation is frequently mishandled as a cancellation. Always check service availability at new address first. • If customer mentions a competitor's specific price, do not confirm or deny it. Focus only on what NexaLink can offer. • Abusive customers: apply 3-Strike Protocol (CS-RULE-016). After Strike 3, terminate the call, flag the account, and log a Customer Conduct case note. Do not transfer. • The agent owns the full lifecycle on a cancellation call: de-escalate, attempt one retention, process the cancellation, document. The only handoff is the Manager Approval ticket for ETF waivers.
