

KNOWLEDGE BASE: PRODUCT & TECHNICAL REFERENCE

Document ID	KB-PROD-01
Version	2.0
Effective Date	10/2/2026
Department	Customer Service & Technical Support

Reference facts for claim validation. Contains no compliance rules and no procedural steps. Use to verify agent-stated facts against ground truth.

1. Mobile Services

1.1 Plan Types

Plan Type	Key Facts
Prepaid	Paid in advance. No credit check. Hard data cap (service stops at limit). No overage fees. Credit expires 30 days after top-up.
Postpaid	Billed end of monthly cycle. Credit check required. Unlimited talk/text options. Data throttled (not hard stop) after high-speed cap. Up to 5 lines per account; data pooled unless 'Per Line Unlimited'.

1.2 International Roaming

- Roaming must be enabled in both device settings AND carrier account level.
- Day Pass: \$10/day flat fee for domestic plan features abroad.
- Troubleshooting: toggle Airplane Mode ON/OFF to force a network search.

1.3 Number Portability (MNP)

- Required from old carrier: account number + Transfer PIN (NTP) + ZIP code.
- Mobile-to-mobile: 2–24 hours. Landline-to-mobile: 3–5 business days.
- Old service remains active until port is 100% complete.

2. Home Internet & WiFi

2.1 Technology Tiers

Technology	Max Speed	Key Characteristic
DSL	100 Mbps	Copper lines. Distance-sensitive (further from hub = slower).
Fiber	1 Gbps symmetric	Glass cabling. Equal upload/download. Lowest latency.
Fixed Wireless (5G Home)	50–300 Mbps (varies)	Cellular towers. Speed varies by signal and congestion.

2.2 Router & WiFi Facts

- Power cycle: unplug 30 seconds, replug. Resolves ~80% of minor issues.
- Factory reset: hold reset pinhole 15 seconds. Erases all custom WiFi names and passwords.
- 2.4 GHz band: better range and wall penetration, slower speed. Best for smart home/IoT devices.
- 5 GHz band: faster speed, shorter range. Best for streaming and gaming.
- Mesh systems: multiple nodes, seamless network. Best for homes > 2,000 sq ft.

2.3 Technician Visits

- Arrival windows: 4-hour blocks (e.g. 8 AM–12 PM).
- Adult presence: someone 18+ must be present at the property.
- Technician install required for new fiber drops or where no existing jack exists.

3. Billing & Payments

3.1 Billing Concepts

Term	Definition
Proration	Partial month charge when account is opened or plan changed mid-cycle. Formula: (days in new plan ÷ days in month) × plan price.
Taxes	Government-mandated fees (sales tax, 911 fees). Listed separately on bill.
Surcharges	Carrier fees (Regulatory Cost Recovery, Admin fees). Listed separately on bill.
Auto-Pay discount	\$5–\$10 off monthly bill for linking a bank account or debit card.

3.2 Payment & Suspension Timeline

- Bill due: 1st of month. Late fee applied: 5th of month.
- Service suspension: 30–45 days past due (depends on credit class).
- Service restoration: within 1 hour of full payment.

4. Account Management

4.1 Plan Changes

- Upgrades: effective immediately.
- Downgrades: effective next billing cycle.
- Relocation: requires 2-week notice. Customer must bring equipment unless switching technology type.

4.2 Cancellations & ETF

- Standard contract terms: 12 or 24 months.
 - Early Termination Fee (ETF): \$20 × months remaining on contract.
 - Non-return fee for unreturned equipment: \$150+.
 - Retention department (Tier 3) handles all cancellation processing.
-

5. Escalation Triggers by Issue Type

Tier 1 agents escalate to Tier 2 when these conditions remain after completing all Tier 1 diagnostic steps.

Issue	Tier 2 Escalation Trigger
No mobile signal	Device shows 'Invalid SIM' or 'Emergency Calls Only' after SIM reseal
Slow home internet	Speed consistently below 50% of plan after modem reboot
WiFi connected, no internet	Red/blinking WAN light persists after full reboot
Cannot make/receive calls (mobile)	'Call Failed' error or fast busy signal after carrier settings update
No VoIP dial tone	BBU failure suspected or line fault indicated after reboot
Unexpected bill charge	Customer disputes valid charge > \$50 or claims fraud
TV: no picture or pixelation	Persists after set-top box reboot or coax check

6. TV & Landline

6.1 TV Package Tiers

Package	Approx. Channels	Content
Basic/Starter	20–50	Local broadcast + public access
Standard	100–150	Adds cable news, sports, entertainment
Premium	200+	Adds HBO, Showtime, on-demand libraries

Channel availability varies by region. Always verify the customer's address in CRM before quoting channel lineup.

6.2 Landline (VoIP)

- VoIP requires active broadband. Does not function during power or internet outages without a Battery Backup Unit (BBU).
- Agents must proactively inform customers of the BBU limitation.
- Landline number portability: 3–5 business days.

6.3 Bundle Discounts (Quad-Play)

Services Bundled	Discount
2 services	5% off total monthly bill
3 services	10% off total monthly bill
4 services (Mobile + Internet + TV + Landline)	15% off total monthly bill

- Discounts applied at account level, not per line.
- Removing any one service triggers re-pricing of the entire account.
